

Form Generation Library

for CodeIgniter® - Quick Overview by Frank Michel

http://frankmichel.de/formgenlib/user_guide/
<http://codeigniter.com/forums/viewthread/107861/>

Elements

-> open (<i>string</i> action [, <i>string</i> name id, <i>string</i> array attributes])
-> fieldset ([<i>string</i> legend, <i>string</i> array attributes])
-> hidden (<i>string</i> name id [, <i>string</i> value, <i>string</i> rules])
-> label (<i>string</i> label, <i>string</i> for [, <i>string</i> array attributes])
-> text (<i>string</i> name id [, <i>string</i> label, <i>string</i> rules, <i>string</i> value, <i>string</i> array attributes])
-> password (<i>string</i> name id [, <i>string</i> label, <i>string</i> rules, <i>string</i> value, <i>string</i> array attributes])
-> textarea (<i>string</i> name id [, <i>string</i> label, <i>string</i> rules, <i>string</i> value, <i>string</i> array attributes])
-> upload (<i>string</i> name id [, <i>string</i> label, <i>bool</i> required, <i>string</i> array attributes])
-> iupload (<i>string</i> name id [, <i>string</i> label, <i>bool</i> required, <i>string</i> array attributes])
-> select (<i>string</i> name id, <i>array</i> \$options [, <i>string</i> label, <i>string</i> array selected, <i>string</i> rules, <i>string</i> array attributes])
-> checkbox (<i>string</i> name id, <i>string</i> value [, <i>string</i> label, <i>bool</i> checked, <i>string</i> rules, <i>string</i> array attributes])
-> checkboxgroup (<i>string</i> name, <i>array</i> \$checks [, <i>string</i> label, <i>string</i> array checked, <i>string</i> rules, <i>string</i> array attributes])
-> radiogroup (<i>string</i> name, <i>array</i> \$checks [, <i>string</i> label, <i>string</i> array checked, <i>string</i> rules, <i>string</i> array attributes])
-> recaptcha ([<i>string</i> label])
-> button (<i>string</i> content [, <i>string</i> name id, <i>string</i> type, <i>string</i> array attributes])
-> image (<i>string</i> src [, <i>string</i> name id, <i>string</i> array attributes])
-> submit ([<i>string</i> value, <i>string</i> name id, <i>string</i> array attributes])
-> reset ([<i>string</i> value, <i>string</i> name id, <i>string</i> array attributes])
-> span (<i>string</i> content [, <i>string</i> array attributes])
-> html (<i>string</i> content)
-> br ([<i>bool</i> clear])
-> hr ([<i>bool</i> clear, <i>string</i> array attributes])
-> space ([<i>bool</i> clear])

Methods

-> action (<i>string</i> controller)	
-> add_class ([<i>string</i> element,] <i>string</i> class)	LA
-> add_class ([<i>string</i> element,] <i>string</i> error)	LA
-> alias (<i>string</i> name, <i>string</i> alias)	
-> config (<i>integer</i> key)	
-> col (<i>integer</i> width [, <i>string</i> float, <i>string</i> text-align])	
-> get ()	
-> get_array ()	
-> get_post ()	
-> indent (<i>integer</i> width)	
-> lang (<i>string</i> language)	
-> margin ([<i>string</i> element,] <i>integer</i> margin, <i>string</i> position)	LA
-> method (<i>string</i> method)	
-> model (<i>string</i> model [, <i>string</i> method, <i>array</i> data])	
-> nobr ([<i>string</i> element])	LA
-> onsuccess (<i>string</i> function, <i>string</i> array values, <i>rules</i> array)	
-> postprocess (<i>array</i> data)	
-> remove ([<i>string</i> element])	LA
-> rem_att ([<i>string</i> element,] <i>string</i> attribute)	LA
-> rem_class ([<i>string</i> element,] <i>string</i> class)	LA
-> set_att ([<i>string</i> element,] <i>string</i> attribute, <i>string</i> value)	LA
-> set_error ([<i>string</i> element,] <i>string</i> message)	LA
-> set_error_label ([<i>string</i> element,] <i>string</i> label)	LA
-> set_value ([<i>string</i> element,] <i>string</i> value)	LA
-> validate ()
